- **Configuration Management tools:** VSS, SVN
- **OOAD/OOP:** Object Oriented Analysis (OOA), Object Oriented Programming (OOP)
- **Knowledge:** Unified Modeling Language (UML)

OPERATING SYSTEMS

Windows
Linux

PROFESSIONAL EXPERIENCE

2013/04 – 2014/08

Developer

HSP VIET NAM

Project: Hospital Management

Customer: Hospitals in Vietnam

Project Description: Hospital management is a web application with functions such as managing clinics (inpatient, outpatient management, patient information management, medical file history) Test management, imaging management, fee payment calculation management

Team size: 6 people

Project size:

Responsibilities:

- Coding

Technologies Used:

Hardware environment

- Window

Software environment

- Spring Framework 2.5

Database

- Oracle 11

Development tools

- Eclipse
- Navicat
- Apache Tomcat

Programming Language:

- Java
- JQuery
- ajax

Project: Database management integrated

Customer: Ministry of Health Viet Nam

Project Description: Database management integrated is a web application with functions such as managing works of Ministry of Health leaders, managing task contents, scheduling tasks for leaders, reminding leaders of the tasks and document sharing

Team size: 6 people

Project size: 18 man.month

Responsibilities:

- Coding

Technologies Used:

Hardware environment

- Window

Software environment

- Spring Framework 3.0

Database

- Oracle 11

Development tools

- Eclipse
- Navicat
- Apache Tomcat

Programming Language:

- Java
- JQuery
- ajax

2014/09–2015/8

Developer

FPT Software

Project: Maintain Stock System

Customer: Japan

Team size: 8 people

Project size:

Project Description: Making modifications as required by clients, mostly relating to the system calculation, such as calculating stocks, bonds trading, money

Responsibilities:

- Analyze the requirement
- Coding and testing
- Create document

Technologies Used:

Hardware environment

- Linux
- Window

Database

- Oracle

Development tools

- Tera term
- FFTP
- VSS
- Apache Tomcat

Programming Language:

- C/C++, Java
- Javascript

2015/09–2018/8

Developer

FPT Software

Project: web app job seeking

Customer: Japan

Team size: 5 people

Project size: 40 people

Project Description: It is project java web app, web site top 3 of Japan provide service search job for student. With requirements high security and optimize code for sql

Responsibilities:

- Communicate with japan member so Analyze the requirement
- Coding and testing
- Create document
- Lead team 2 member
- Review product of member

Technologies Used:

Hardware environment

- Window

Database

- Oracle

Development tools

- Tera term
- FFTP
- GIT
- SVN
- Apache Tomcat

Programming Language:

- Java seasar framework
- Spring framework
- Angular 4
- jsp
- Javascript
- ES 6

2018/08 – Now

Developer at Hybrid technologies company

2018/08 – 2019/06

Project: Web app car insurance

Customer: Japan

Team size: 7 people

Project size: 20 people

Project Description: It is project java web app use REST architectural. Support seller, car dealership manager sell car insurance old.

Responsibilities:

- Communicate with BrSE so Analyze the requirement
- Create BD, DD
- Coding Backend
- Review product of new member

Technologies Used:

Hardware environment

- ubuntu

Database

- Mysql

Development tools

- IntelliJ
- GIT

Programming Language:

- Spring framework
- JPA
- Angular 5

2019/08 – 2020/03

Project: Web app selling airline tickets

Customer: Japan

Team size: 5 people

Project size: 30 people

Project Description: It is project use python code frontend , java spring code backend API

Responsibilities:

- Communicate with BrSE so Analyze the requirement
- Coding Backend

Technologies Used:

Hardware environment

- ubuntu

Database

- Oracle

Development tools

- IntelliJ
- GIT

Support tool

- Docker

Programming Language:

- Java Spring framework

- Python diango frameword

2020/03 – Now

Project: Web app Online study

Customer: Japan

Team size: 5 people

Project size: 10 people

Project Description: It is project use java web app, REST a architectural

Responsibilities:

- Communicate with BrSE so Analyze the requirement
- Create BD
- Coding Backend, frontend

Technologies Used:

Hardware environment

- ubuntu

Database

- postgreSql

Development tools

- IntelliJ
- GIT

Support tool

- Docker
- Jhipster generator code

Programming Language:

- Java Spring framework
- JPA
- Reactjs mobx
- Amazon service (S3)
- Elastic search
