Xuyen Ha Binh

Senior Software Engineer at TIKI Corporation
Hanoi

Experience

TIKI Corporation

Senior Software Engineer - Catalog Platform
July 2020 - Present (1 year 5 months)

Hanoi, Thành Phố Hà Nội, Vietnam

- Catalog Platform is the core system to manage millions of products of the entire TIKI System. Every interaction of an E-Commerce system is started from product information. Catalog platform is a basement to scale both business and system.
- Backend engineer of BuyBox, a project that enhances customer experience when shopping on Tiki.vn (with a product, choose an offer that best suits the customer). We scale Contextual-bandits model to handle all traffic on both read-side and write-side in a real-time manner.

Viettel Cyberspace Center

Software Engineer

March 2016 - May 2020 (4 years 3 months)

Hanoi, Thành Phố Hà Nội, Vietnam

- Developed a high performance solution to examine every single packet of massive network traffic (Deep Packet Inspection), a great opportunity to improve my understanding of high-performance solutions. DPI is a basement to develop advanced solutions such as firewall, data monitoring system...
- Key member of a team responsible for developing Viettel Operating System. We mastered the technology of building package repository, customizing system service, enhancing kernel security... and packaging everything into an OS image to widely deploy in Viettel Corporation and Ministry of Defence. I gained a lot of knowledge about operating system principles by taking responsibility for this project.

Bkav Corp.

Intern

May 2013 - February 2016 (2 years 10 months)

Hanoi, Thành Phố Hà Nội, Vietnam
