

| Personal Details | |
|-----------------------|--------------------------|
| Name | Hung Dao Cong |
| Job Title | Software Engineer |
| Contact Number | |
| Gmail | |
| Skype | hungdc256 |

| Technical Skills | |
|--------------------------------|------------------------------------------------------------------------------------------------------------------------|
| OS | Microsoft Windows XP, Windows 7, 8, Ubuntu ,MacOS |
| Languages | C/C++, Java, Java Script, HTML |
| Databases | MySQL, Microsoft SQL Server, Postgres |
| Packages and Frameworks | HTTP, Spring MVC, Spring Boot, Spring Cloud, Spring security, Microservice ,Hibernate, JPA, Angular, JQuery, Bootstrap |
| Tools | Eclipse, Net beans, Visual 2013, Maven, MySQL Workbench, SQL Server, Git, IntelliJ |
| Other | Redis Cache |

| Education and Qualifications | |
|------------------------------|------------------------------------------------------------------------------|
| | Major: Information Technology at Hanoi University of Science and Technology. |
| | Major: Banking and Finance at Hanoi University of Business and Technology. |

PROJECT EXPERIENCE

| | |
|----------------------------|---------------------------------------------------------------------------------------------------------------------------------------|
| Company | FinOS |
| Project | MIRE |
| Duration | May 2020– November 2020 |
| Position | Full Stack Developer |
| Project Description | - The purpose of this project is used for investment via mobile app such as calculate free, tax, interest base on amount money, tenor |
| My Responsibility | <ul style="list-style-type: none"> • Analysis requirement. • Coding and Fix bug, and optimize performance |
| Technology | Java, Spring Boot, Spring Cloud, Spring Batch, JPA, Postgres, Spring security Oauth2 JWT, Redis, Jasper Report, RabbitMQ, AWS |

| | |
|----------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------|
| Company | FinOS |
| Project | Accounting |
| Duration | November 2019 – May 2020 |
| Position | Developer |
| Project Description | - The purpose of this project is used for customize some of modules and support consolidation Balance Sheet and Profit & Loss for multi company |
| My Responsibility | <ul style="list-style-type: none"> • Analysis requirement. • Coding and Fix bug and maintain |
| Technology | Python, Odoo, postgres |

| | |
|----------------------------|-----------------------------------------------------------------------------------------------------------------------|
| Company | Fsoft |
| Project | ALA |
| Duration | December 2019 – November 2019 |
| Position | Backend Developer |
| Project Description | - The purpose of this project is used for collection data of lab to reporting and analytics data |
| My Responsibility | <ul style="list-style-type: none"> • Analysis requirement. • Coding and Fix bug, and maintain |
| Technology | Java, Spring Boot, JPA, Hibernate, Postgres, Spring security Oauth2, Spring Cloud, Microservice |

| | |
|----------------------------|-----------------------------------------------------------------------------------------------------------------------------------------|
| Company | Fsoft |
| Project | ParkWay |
| Duration | December 2018 – June 2019 |
| Position | Backend Developer |
| Project Description | - The purpose of this project is used for development Health Care area which have been collecting data to diagnosis and claim insurance |
| My Responsibility | <ul style="list-style-type: none"> • Analysis requirement, convert jsp servlet to spring • Coding and Fix bug. |
| Technology | Java, Spring Boot, JPA, Hibernate, Postgres, Spring security, Drools |

| | |
|-----------------|-------------------------------|
| Company | 1Pay |
| Project | Agent network |
| Duration | November 2017 – December 2018 |
| Position | Backend Developer |

| | |
|----------------------------|------------------------------------------------------------------------------------------------------------|
| Project Description | - The purpose of this project is used for development network Agent which have been using TrueMoney-Wallet |
| My Responsibility | <ul style="list-style-type: none">• Analysis requirement.• Coding and Fix bug. |
| Technology | Java, Spring Boot, JPA, Hibernate, Postgres, Spring security Oauth2 |

| | |
|----------------------------|------------------------------------------------------------------------------------------------------------------|
| Company | FSoft |
| Project | Workbench |
| Duration | September 2017 – November 2017 |
| Position | Backend Developer |
| Project Description | - The purpose of this project is used for create the sematic web, processing data through data import and export |
| My Responsibility | <ul style="list-style-type: none">• Analysis requirement.• Coding and Fix bug. |
| Technology | Java, Spring Boot, JPA, MySQL, HTML, CSS, AngularJS, NodeJS, Websocket. |

| | |
|----------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Company | FSoft |
| Project | Olympic |
| Duration | February 2017 – September 2017 |
| Position | Backend Developer |
| Project Description | - The purpose of this project is to create travel planning and share plan via social network with information between points such as travel by means of transport, departure time, arrival time... |
| My Responsibility | <ul style="list-style-type: none">• Analysis requirement.• Coding and Fix bug.• Unit Testing, Execute Test. |

| | |
|-------------------|-----------------------------------------------------------------------------------------|
| Technology | Java, Spring Boot, JPA, MySQL, AWS (Cognito, S3), Google API, ReactJs, Redis, HTML, CSS |
|-------------------|-----------------------------------------------------------------------------------------|

| | |
|----------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Company | FSoft |
| Project | HPGL |
| Duration | September 2016 – February 2017 |
| Position | Backend Developer |
| Project Description | - The purpose of this project is programming interact with printers via web-based |
| My Responsibility | <ul style="list-style-type: none">• Analysis requirement.• Create layout UI for the project• Coding (convert Struts1 to Struts2) and Fix bug. |
| Technology | Java, JSP, Struts1, Struts2, CSS, MySQL |

| | |
|----------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Company | NashTech |
| Project | Arria |
| Duration | July 2016 –September 2016 |
| Position | FrontEnd Developer |
| Project Description | <p>- Arria NLG plc is a UK-based company offering Artificial Intelligence technology in data analytics and information delivery. It is one of the pioneering companies in the space of automatic text generation.</p> <p>- The purpose of this project is to develop Zeta which is a document authoring environment based on Arria NLG's Collaborative Co-Authoring (CoCoA) tool. CoCoA will serve as the foundation for Zeta, supporting features such as editing, locking, versioning and searching. An extension module for CoCoA will also be implemented, which will encapsulate the</p> |
