--	------

Note

Level:

1-4 Basic, need more practice.

5-7 Intermediate, can use it at work.

INTRODUCE MYSELF

I am Huy, 26 years old, from Thach That - Ha Noi. Currently single.

I have more than 4 years of experience working with Java language and 2 years of experience as PM in project.

I have had almost two years working in Samsung with the main job of fixing issues related to the Graphics Framework. Also here I do some internal projects, tools for our work process.

My strengths are algorithm and logical thinking fast. I can quickly access a new technology as well as a programming language.

Moreover, I had half a year to do out source with the Japanese market, in there I have developed a website that is logically logical for Japanese customers Selling from design analysis to testing and deploying to a real environment on the Spring boot framework.

I am a happy and friendly person according to everyone's comments so easily integrate into a new environment.

THE HOBBY

Play game: Game haflife, AOE, LOL.

Sport: Football

Listen music
