

# Nguyen Thanh Kien

Java Developer

## Objective

- To continue improving myself and looking for opportunities to become a valued developer in the next few years.
- To build good relationships, affirm brand for myself and contribute my best to the company.

## Education

Hanoi University of Science and Technology  
[ Sep 2013 - Jul 2018 ]

Major: Ship Buiding Engineering

## Work experience

Synergix Technologies Vietnam [ 2019 - 2020 ]

Java EE Software Engineer

- Read & understand technical specifications
- Analyze product requirements, design features, implement and test software components
- In Synergix, the product is an ERP software using quite old technologies (Seam 2, Jsf 1.x, Jpa 2, Richfaces). Some new modules have been upgraded to Java EE 7 (CDI), Hibernate and Primefaces but not many. Due to the peculiarities of ERP, the business is extremely complex. Developers need to read and fully understand such English documentation in both technical and non-technical contexts, work directly with SA/BA team and support customers in Singapore via Skype.

## Additional information

Hometown: Ly Nhan, Ha Nam.  
I am an honest, sociable, very hard-working and responsible person. All about programming I learned from the internet by myself. I've been working in Synergix Technologies Vietnam for a year and had good performance as well as good appreciation of my leader. I now want to work in a new environment, more challenging, new technologies to learn and I really want to become a member of the company to work for a long-term and dedicate my best.

## Contact information

December 25, 1995

295 Quan Nhan Lane, Thanh Xuan District, Ha Noi City.

## Skills

Java core	<div><div></div></div>
J2EE(JSF, JPA,...)	<div><div></div></div>
