I have 6 years of experience in the IT industry and working in professional projects which are managed directly by the customer such as TIBCO or Deutsche Telekom and so on.

During the working process, I have the chance to gain more knowledge and develop skills for a full stack developer.

Besides, I also have to organize the team as a ScrumMaster. I have to discuss with customers frequently, estimate the workloads, involved in the design and analysis process, make the requirement more clear, and write the documentation. I also have to focus on the quality of the product, optimize performance, and security.

Generally organizational and planning skills with the ability to work under pressure skills and outstanding team building and client satisfaction.
