Ascend Tech, the company behind missions that bring the biggest fintech platform to South East Asia countries. In Ascend, we challenge ourselves everyday about constructing fully configurable financial modules as services.

As an Android Developer, this is a few of my humble contributions:

- Always stick with Scrum strategy.
- Develop full functional API provider service for front-end clients. Its responsibility is collecting and composing data from our system for mobile devices, and back-office web client
- Join mobile team to build and deliver mobile applications for Truemoney agents
- Take business trips to countries that use our platform, support them to integrate their own business logic to regional mobile application.
