OBJECTIVE

I'm looking for a working position like a software engineer or research and development engineer in a company that has good environment to work.

First of all, I'll try to get along with my co-workers and get on with the work at the company

In two or three years, I'll take part in training course, self-study and learn experiences from co-workers etc to become skillful engineer and apply my knowledge, skills to improve and create new services for the company. After that, I'll try to get a higher position such as senior developer or software architect.
