## EDUCATION

**MAJOR: INFORMATION TECHNOLOGY**

( 2014 - 2018 )

/ HUE UNIVERSITY OF SCIENCE

Main subject: Software Engineering

## WORK EXPERIENCES

**DEVELOPER / FPT-SOFTWARE** ( 6/2018 - now )

### RPA - Developer

I have participated in a development project on RPA, specializes in research and development of automation system functions in work and daily life. I am a member of the team developing automation functions, our application has been used in many large domestic and foreign companies.

My mission is:

- + Building Activities of RPA Studio tool
- + Building manage webserver tool
- + Building RPA Bot auto running tool
- + Support automation of repetitive schedules

### JAVA - Developer

I participated in a development project on work management, specializing in research and development of job management functions to increase management performance, the system helps to accurately calculate indicators and statistics for users.

My mission is:

- + Analysis and design
- + developer
- + Optimizing code
- + Bug fixing
- + Bug fixing

## SKILLS

- SPRING MVC, SPRING BOOT, HIBERNATE, JPA, ELASTICSEARCH, JAVA 8, NODEJS

- DATABASES: SQL SERVER, MYSQL.

- ANGULAR(USE VERSION 5 AND ABOVE), JQUERY, CSS, JAVASCRIPT

- C++, .NET, WPF

- DEVELOPMENT TOOLS, METHODOLOGIES & ENVIRONMENTS: SPRING TOOL SUITE, ECLIPSE, JETBRAINS WEBSTORM, VSCODE, SUBLIME TEXT, ...

- GIT

- ENGLISH: B1

## CERTIFICATES

⚙ AUTOMATION ( *DECEMBER* )  
ANYWHERE - 2018

AUTOMATION ANYWHERE  
CERTIFIED  
ADVANCED RPA PROFESSIONAL

⚙ RPA ( *JULY-* )  
CERTIFICATE 2018

RPA Developer Foundation Training  
(UiPath)

## PROJECTS

📝 RPA PLATFORM ( 6/2018 - 10/2018 )

I have participated in a development project on RPA, specializes in research and development of automation system functions in work and daily life. I am a member of the team developing automation functions, our application has been used in many large domestic and foreign companies. Use the latest technologies and languages into the project, with an experienced team in the field of RPA

My mission is :

- + Building Activities of RPA Studio tool
- + Building manage webserver tool
- + Building RPA Bot auto running tool
- + Support automation of repetitive schedules Technologies

Technology used: C#, WPF, Java 8, Angular, ....

📝 MSC ( 10/2019 - 2/2020 )

I was involved in a goal management project over time, we develop project to manage the goals of all members of the department. Statistics the results achieved according to the set goals, from there, we can evaluate the productivity of each member according to their goals.

My mission is:

- + Analysis and design
- + tracking task of members
- + developer
- + Review the code
- + Optimizing code
- + Bug fixing

Technology used: Spring boot 2, Java 8, Hibernate, JPA, Elasticsearch, Angular (Use version 5 and above), NodeJS, jquery, JavaScript, Css, Html, ...

## TASKS MANagements ( 11/2018 - now )

I participated in the product project, i have developed applications for users according to actual needs, the project brings real value in line with market demand. With the project following the product direction, we always put the needs of the user first. the project aims to manage tasks in a dynamic manner, and solve work management problems for an organization or company. The product is developed based on the need to manage work, time, money, task assignment, effort. Keep track of other people's work, calculate effort, compensation, manage leave, evaluate work efficiency.

Project with more than 1000 users, control data and statistics in real time, Integrated payroll system, the system integrates the custom field function.

I am a member of the team with the task of surveying, analyzing, designing and developing products. We have adopted the latest and suitable technology for the project.

My mission is:

- + Analysis and design
- + developer
- + Review the code
- + Optimizing code
- + Bug fixing

Technology used: Spring boot 2, Java 8, Hibernate, JPA, Elasticsearch, Angular (Use version 5 and above), NodeJS, jquery, JavaScript, Css, Html, ...
