INTRODUCTION

After 4 years of educating and training in full stack programming at Hope College in the US, I desire to become a professional programmer. Therefore, I want to obtain an entry-level position as a programmer to have a chance to work and learn more about programming in a professional environment.

TECHNICAL SKILLS

Programming languages

Java, Python, React (TypeScript), HTML/CSS.

Framework

Eclipse, Visual Studio, Android Studio, VS Code.

Operating Systems

Windows, MacOS, Kali OS (Linux).

Database

SQL, Access.

OTHER SKILLS

Languages

Fluent in written and spoken English.

Microsoft Office

Experience with Microsoft Word, Excel/Macro, PowerPoint, Access.

Photography

Experience with studio photography, Adobe Photoshop and Adobe Lightroom.

EDUCATION

Hope College - Michigan, U.S.

Bachelor of Science in Computer Science And Programming

Expected in May, 2021

EXPERIENCE

Web Developer

Hope College | Spring 2021

Design and create a personal portfolio site.

- **Used HTML and CSS to create and design the website.**
- **Applied web design knowledge to make a satisfying end product.**

Web App Developer

Hope College | Fall 2020 and Spring 2021

Design and create a web app showing current and prospective students the opportunities available to them through a Hope College education.

- **Worked with a client in a group of 4 students.**
- **Self-study React TypeScript with Google Firebase to develop the site and store data.**
