❖ PROJECTS:

1. Cyber Lending/P2P (1/2019 - 4/2020)

- **Company:** FIVE9 VIETNAM
- **Description:** Peer-to-peer lending, also abbreviated as P2P lending, is the practice of lending money to individuals or businesses through online services that match lenders with borrowers. Peer-to-peer lending companies often offer their services online and attempt to operate with lower overhead and provide their services more cheaply than traditional financial institutions. As a result, lenders can earn higher returns compared to savings and investment products offered by banks, while borrowers can borrow money at

lower interest rates, even after the P2P lending company has taken a fee for providing the match-making platform and credit checking the borrower. There is the risk of the borrower defaulting on the loans taken out from peerlending websites.

- **Team size:** 12

- **My responsibilities:**

- + Study requirement
