Project References

From 01/2020 to Present

Project : MPCCCD: A simulation of a citizen identification card system
 Customer : People's Police College 1
 Position : Developer
 Description : A simulation of a citizen identification card system
 Technology : C#(WPF), SAP Crystal reports ,SQL server 2012
 Responsibilities :

- Wpf Model – View – ViewModel (MVVM) with entity framework, crystal report
- Rest Api fingerprint matching

 Special software : C#, SAP Crystal reports ,SQL 2012, Internet Information Services (IIS)

From 01/2019 to Present

Project : TTTT: Online bill payment system
 Customer : Hanoi Clean Water Company
 Position : Developer
 Description : Provides API functions for water bill payment for banking partners
 Technology : Java, Oracle 11g
 Responsibilities :

- Rest Api using java spring boot
- Program to read csv files and program export data to csv files
- Support partners: writing client connect the Api
- Shell script linux
- Support to operate online bill payment system

 Special software : PL/SQL, Java Spring Boot, apache tomcat, puty, winscp, vnc-server

From 07/2016 to 01/2017

Project : CIC: Connecting and authenticating customer information system
 Customer : Vietnam National Credit Information Center
 Position : Developer
 Description : Verify customer information
 Technology : Java, nhibernate, Oracle 11g
 Responsibilities :

- Programming to read excel files of Vietnam National Credit Information Center import data to System the Vietnam National ID card.

Special software : Java nhibernate, Oracle 11g ,PL/SQL, puty, winscp, vnc-server

From 12/2013 to Present

Project : CMND: Producing, issuing and managing the Vietnam National ID card

Customer : Ministry of Public Security

Position : Developer

Description : Provide integrated solution with detailed design, install and training and technology transfer of the Identification card production, issuance management system.

Technology : Java, Oracle 10g, Oracle 11g, Oracle form report

Responsibilities :

- Data synchronization between systems of the Identification card production, issuance management system
- The program connects the webservice of the residential identity system
- The program export data into xml files.
- Support system operation.

Special software : Java, puty, winscp, vnc-server

From 01/2011 to Present

Project : MOFA2: Management of online issuing Viet Nam Visa for Foreign

Customer :Ministry of Foreign Affairs

Position : Developer

Technology : Java,C#; SAP Crystal reports ,SQL server 2012

Description : Visa entry to Vietnam

Responsibilities :

- Data transmission between Consular Department, Department of Foreign Affairs and representative offices of Vietnam
- Program to read excel files and insert data
- Editing software according to business requirements, editing reports
- Support system operation.
