Position	Team Learer/ Technical/Developer
Environment	iOS 7, 8 or Higher (the both of iOS and Android), **Using Swift language for iOS**
Project Description	

Characteristic:

Develop application on iPhone (Product of Company)

Objective:

Ezyhaul is a technology company that will bring together shippers and carriers in a very fragmented market. The Company's technology platform will allow for a highly efficient matching of supply and demand comparable to the way that GrabTaxi matches passengers with available taxi's. An important difference between GrabTaxi and Ezyhaul is that Ezyhaul will operate in a B2B environment. This means that the business model and user interfaces will have to be adjusted to the requirements of a business user, rather than a consumer.
