📍 Yên Nghĩa - Yên Lộ - Hà Đông

SKILLS

Languages
• Java
• Javascript/Jquery/Ajax
• HTML/CSS
• XML/JSON
• ReactJS
• Groovy
• Angular
• Typescript

Databases
• MSSQL, MySQL, PostgreSQL
• MongoDB, Neo4J
• Oracle

Frameworks/Techniques
• Spring/SpringBoot
• Hibernate
• Restful API/Swagger
• Bootstrap/LESS/SASS
• Axon 3
• Redis/Memcache
• Message Queue
• Wicket

Unit Test
• JUnit
• Spock
• Mockito

AutoTest
• Cypress
• Jmeter
• Selenium

Application servers

SUMMARY

In 5+ years on software development
• Strong analysis, design database and system.
• Logical thinking and solving technical issue independent.
• Strong in research & development, also willing to learn new technologies.
• Have knowledge on software development projects (full project cycle, including:
initiating, planning, executing, monitoring, controlling, testing and closure phases).
• Hard work - progressive - eager.

Core Competencies
 • Offshoring / Outsourcing
 • Programming
 • Requirement/Problem Analysis
 • Code Quality Assurance
 • Sharing Knowledge
 • Teamwork
 • Learning
 • Testing

WORK HISTORY

FPT SOFTWARE   **2018 - PRESENT**
Developer

Projects:
- Annie
Financial diagnostics system.
  Responsible:
     • Design and implement product on web-app
  Highlight techniques:
     • Power BI
     • MariaDB
     • Springboot
     • Front-end: JavaScript/jQuery, Angular/Typescript

- TYD
 Work on web-app to develop and enhance.
 Provide ~10-15 business functions for warehousing
  Responsible:
     • Design and implement product on web-app
  Highlight techniques:
     • Hibernate
     • Wicket
     • MSSQL
     • Front-end: JavaScript/jQuery

- EDI.
EDI is data processing system. EDI system receive data from other center then convert,

- Tomcat
- Ant

Development tools
- IDE: Eclipse, VS Code
- Build: Maven, Gradle
- VCS: Git, SVN
- Management: Mantis, Redmine, OpenProject, JIRA
- Docker

Methodologies
- Agile (Scrum)
- Design pattern, UML

filter or split it. The system run on bash job by the time.
  Responsible:
- Requirement design.
- System analysis.
- Design and coding
  Highlight techniques:
- Shell/batch script
- CICD

- ECGS

This is a plugin of MCUExpresso application. Based on old desktop application and MCU component development guide, we convert old application to plugin. MCUExpresso.
  Responsible:
- Requirement design.
- System analysis.
- Design and coding
  Highlight techniques:
- Build eclipse plugin
- MCUExpresso expression language

NTT DATA VIETNAM   2016 - 2018
Developer

Projects:
- Warehouse management.
Work on web-app to develop and enhance.
Provide ~10-15 business functions for warehouse management
  Responsible:
- Requirement design.
- System analysis.
- Design and implement product on web-app
- Automation and Performance test.
- Customer training
- Maintenance
  Highlight techniques:
- Java-Maven, Spring, Mybatis, JPA
- Application server(Tomcat), Databases(PostgreSQL/MongoDB/Neo4J)
- Restful API, Open API(Swagger)
- DDD
- Unit test: Spock test
- Automation test: Cypress
- Front-end: JavaScript/jQuery, ReactJS, HTML/CSS, Bootstrap.

- L-series.
Work on web-app to develop and enhance.
Provide ~15 business functions for logistics management
  Responsible:
- Requirement design.
- System analysis.
- Design and implement product on web-app
  Highlight techniques:

- Java, Maven, Spring, Mybatis, JPA
- Application server(Tomcat), Databases(PostgreSQL)
- Restful API, Open API(Swagger)
- DDD
- Unit test: Spock test
- Automation test: Cypress
- Front-end: JavaScript/j-Query, HTML/CSS, Bootstrap.

- Timesheet management

Work on web-app to develop and enhance.

Provide ~10 business functions for employee management

Responsible:

- Requirement design.
- System analysis.
- Design and implement product on web-app
- Automation and Performance test.

Highlight techniques:

- Java, Maven, Spring, Mybatis, JPA
- Application server(Tomcat), Databases(PostgreSQL)
- Restful API,
- DDD
- Unit test: Spock test
- Front-end: JavaScript/j-Query, ReactJS , HTML/CSS, Bootstrap.

IFI SOLUTION   **2015 - 2016**

Developer

Projects:

- Master data management

Helps customers measure the change in quality and process performance over time. These data are important pieces of information when determining how and where to make improvements. It is KPIs for company business objectives that demonstrated on data chart and dashboard.

Responsible:

- Provide the solutions on both functional and technical aspect includes
web application and background services through API
- UI design
- Development: implementation, test.

Highlight techniques:

- Java core, Java Servlet, EBX
- Databases(MSSQL/MySQL/H2)
- XML/CSV/Excel/JSON processing
- Chart visualization
- Unit test: J-Unit
- Front-end: JavaScript/jQuery, HTML/CSS.
