- Software Process: Agile (Scrum)
- IDE: Eclipse, Netbean, Intellij Idea, Android Studio
- Application and Web Servers: Tomcat, Redis Cache, elasticsearch, nginx
- Testing: JUnit
- Other technical: Design Pattern, Resful webservice,SOLID principles, Algorithm,...

IV. WORKING EXPERIENCE

08/2016 - 05/2017	Organization	GAPDDY Software
	Roles	Android Developer (part time)
	Responsibilities	Reseach java android platform Design and develop android applications
	Technologies	Android, Java

08/2017 - 06/2018	Organization	FPT Software
	Roles	Java Developer
	Responsibilities	Reseach java platform, java framework Design and code new function Analyze, fix bug of web system
	Technologies	Java, Spring, JSP, Jquery, HTML, CSS, Oracle, SQL Server

06/2018 - 10/2018	Organization	MP Software
	Roles	Java Developer
	Responsibilities	Reseach java platform Design and code new function Analyze and fix bug of bankplus system
	Technologies	Java, Socket, ISO 8583 , Multithread, Oracle

10/2018 - 03/2019	Organization	1Pay
	Roles	Java Developer
	Responsibilities	Develop new function for project: Online Payment TrueMoney Analyze and fix bug
	Technologies	Java8, Spring, Hibernate, PostGree, Redis cache

04/2019 - 08/2020	Organization	Rikkeisoft
	Roles	Java Developer
	Responsibilities	Join projects of company with role is java developer
	Technologies	Java8, Spring, Hibernate, PostGree, Redis cache

V.   PROJECT LIST

Project Zip & UnZip	
Duration	08/2016 - 02/2017
Customer	Gpaddy
Description	The application allows to compress and extract most types of compressed formats as: rar, zip, 7zip, iso ... Simple interface, easy to use
Responsibilities	Design and code function Reseach and use 7-zip library Testing and write document
Technologies	Java, Android

Project PhoneToMic	
Duration	02/2017 - 05/2017
Customer	Gpaddy
Description	Turning smartphones such as micro Save recorded files compressed or high quality. Play recorded files.
Responsibilities	Design and development application Testingapplicationand write document
Technologies	Java, Android

Project eServices - Starhub	
Duration	10/2017 - 06/2018
Customer	Starhub - Singapore
Description	Starhub is one of Singapore's largest telecom companies. Eservices are one of the web systems so that they allow customers to sign up for their internet service.
Responsibilities	Analyze and design new function Development Testing and write document Bug fixing
Technologies	Java, Java Script, SQL, HTML, CSS, Strut1, Jquery, Oracle, Apache POI lib, JavaMail lib

Project Bankplus-ViettelPay	
Duration	06/2018 - 10/2018
Customer	MB Bank
Description	The system receives requests from ViettelPay. From there, the system queries the DB, retrieves data from the core systems: way4, T24. Then system process this data and response to ViettelPay
Responsibilities	Analyze and design new function Development Testing and write document Bug fixing
Technologies	Java, Socket, ISO 8583, Multithread, Log4j, JUnit, Oracle

Project Stalk English Online	
Duration	10/2018 - 02/2018
Customer	Freelancer
Description	STALK English Class is the website for stalk English center. The website has functions such as news management, list of students registering for courses, security and authentication for user of system, course management, student profiles ...
Responsibilities	Analyze requirement from customer Development and testing
Technologies	Java8, Spring, MySql, Bitbucket,Jquery, HTML, BootStrap...

Project Online Payment	
Duration	10/2018 - 03/2019
Customer	TrueMoney
Description	TrueMoney is a multinational corporation implementing payment and financial services in Southeast Asia. Online payment is Truemoney's project that allows users to pay online via domestic card, international card, truemoney e-wallet.
Responsibilities	Analyze and design new function: token payment Development Testing and write document Bug fixing
Technologies	Java8, Spring, Hibernate, Hibernate Validator, PostgreSQL, Redis Cache, Bitbucket, Jquery, HTML, BootStrap...

Project Property Management System	
Duration	4/2018 - 10/2019
Customer	Thien Minh Group
Description	Thien Minh Group is one of largest travel companies of Viet Nam which owned a lot of 5-star hotel. Property Management System allow to doing the work as: manual or auto book single/group room, manage customer, manage room, statistical data …
Responsibilities	Analyze and design new function: transaction management, statistical data, manage customer… Development and testing Bug fixing

Project Canbus	
Duration	11/2019 - 4/2020
Customer	Systena
Description	Systena is large company of Japan. Canbus is system that allow other company hire services. Canbus allow users to be able their customize systems.
Responsibilities	Analyze and design new function: login saml, asynchronous download, upload app. Development and testing Bug fixing
Technologies	Java8, Spring, mongoDB, redis, elasticsearch, git, nginx, microservice

Project Business Management	
Duration	5/2020 - 8/2020
Customer	Viettel Solution
Description	Viettel is one of telecom companies with the largest number of customer. Viettel Solution is a subsidiary of parent company – Viettel. QuanLyKinhTe is system that manage information of army business organizations.
Responsibilities	Analyze and design new function: manage title, organization information, upload download report … Development and testing Bug fixing
Technologies	Java8, Spring, oracle, git, angularjs
